## COURSE DESCRIPTIONS

**PRA 749                      Functional Sports Chiropractic Elective I                      (0/2/1/30)**

The Functional Sports Chiropractic Elective Part I equips chiropractic students with the functional diagnostic skills needed to specialize in a movement based, functional sports performance or sports injury practice. After learning the Functional Movement Screen (FMS) and the Selective Functional Movement Assessment (SFMA), students can quickly find the cause of movement dysfunction or pain by logically breaking down dysfunctional movement patterns in a structured, repeatable screen and assessment. FMS and SFMA results provide valuable feedback throughout the treatment process to ensure we are meeting short and long-term health and movement goals for lifelong health and vitality.

**Prerequisites: Completion of CLI 650**

**PRA 769                      Functional Sports Chiropractic Elective II                      (0/2/1/30)**

The Chiropractic Functional Sports Elective Part II equips chiropractic students with the knowledge and certification to specialize in a sports-specific practice focused on golf and baseball. The Titleist Performance Institute (TPI) Certification portion of the course teaches the student how to quickly evaluate a golfer's physical readiness using TPI's physical assessment screen and how the results of that assessment are correlated to the player's swing characteristics. The OnBase University (OnBaseU) certification portion of the course teaches students how the human body functions in relationship to baseball and softball hitting, plus how to quickly evaluate a player's physical readiness using OnBaseU's physical assessment screen. **Prerequisites: Completion of CLI 650**

**RDTC 120                      Basic Procedures                      (4/4/0/3/64)**

This course is an in-depth study in the concepts and principles of radiographic positioning and procedures involving the chest, abdomen, upper extremity, and shoulder girdle. Content will include, but is not be limited to: anatomy, body habitus, regions, planes, positioning terminology, radiation protection, and common pathologies. The laboratory portion of this course will include hands-on positioning, with emphasis placed on patient care, optimal image production, image critique, imaging variables, radiation protection, critical thinking, and problem solving related to these anatomical structures

**RDTC 140                      Intermediate Procedures                      (4/4/0/3/64)**

This course is an in-depth study in the concepts and principles of radiographic positioning and procedures involving the lower extremity, pelvic girdle, and cervical and thoracic spine. Content will include, but is not be limited to: anatomy, body habitus, regions, planes, positioning terminology, radiation protection, and common pathologies. The laboratory portion of this course will include hands-on positioning, with emphasis placed on patient care, optimal image production, image critique, imaging variables, radiation protection, critical thinking, and problem solving related to these anatomical structures.

**RDTC 150      Advanced Procedures**

**(4/4/0/3/64)**

This course is an in-depth study in the concepts and principles of radiographic positioning and procedures involving the skull. Content will include, but is not be limited to: anatomy, body habitus, regions, planes, positioning terminology, radiation protection, and common pathologies. The laboratory portion of this course will include hands-on positioning, with emphasis placed on patient care, optimal image production, image critique, imaging variables, radiation protection, critical thinking, and problem solving related to these anatomical structures.

**RDTC 165      Contrast Procedures**

**(4/4/0/3/64)**

This course is an in-depth study in the concepts and principles of radiographic positioning and procedures involving biliary tract, gastrointestinal system, urinary system, special procedures, and pharmacology. Content will include, but is not be limited to: anatomy, body habitus, regions, planes, positioning terminology, radiation protection, and common pathologies. The laboratory portion of this course will include hands-on positioning, with emphasis placed on patient care, optimal image production, image critique, imaging variables, radiation protection, critical thinking, and problem solving related to these anatomical structures. Further content provides basic concepts of pharmacology and venipuncture, administration of diagnostic contrast agents, and special precautions related to contrast administration.

**RDTC 210      Imaging Properties**

**(4/4/0/3/64)**

This course establishes an understanding of the principles, components, and operation of digital imaging systems found in diagnostic radiology. Factors that affect the imaging chain, archiving and retrieval are discussed. Additional variables affecting the image are explored and concepts presented in previous imaging courses are expounded upon, including their impact on photographic and geometric properties. The laboratory component is designed to reinforce concepts presented during the course lecture.

## FINANCIAL AID SATISFACTORY ACADEMIC PROGRESS (SAP) (Replaces previous policy)

To be eligible for federal financial aid a student must maintain satisfactory academic progress (SAP). Federal financial aid includes Federal Pell Grant, Federal Supplemental Educational Opportunity Grant, Federal Direct Loans and Federal Work Study.

The SAP policy for Cleveland University-Kansas City is as follows:

### QUALITATIVE STANDARD

- Maintain a cumulative grade point average (GPA) of at least 2.0. GPA is reviewed at the end of each trimester/semester. Transfer credits from other institutions are not included in the cumulative GPA.

### QUANTITATIVE STANDARD

- Successfully complete at least 66.67% of all attempted credit hours each trimester/semester. Reviewed at the end of each trimester/semester.
- Grades of D, F, XF (non-attendance), I (incomplete) and W (withdrawn) does not constitute successfully completed credit hours.
- Student enrolled in less than 6 hours per trimester/semester is not eligible to receive Federal Direct Loans.

### MAXIMUM TIMEFRAME

- Successfully complete the program within 150% of the length of the program. Cleveland University-Kansas City applies this limit to the total number of attempted credit hours (including transfer credit hours).
  - a. Bachelor of Science in Human Biology is 186 attempted credit hours
  - b. Associate of Arts in Biological Sciences is 90 attempted credit hours
  - c. Associate of Applied Science is 113 attempted credit hours
  - d. Certificate program is 18 attempted credit hours
- All requirements for graduation must be met within the timeframes indicated below by program.
  - a. Doctor of Chiropractic within 18 trimesters.
  - b. Master of Science in Health Education and Promotion within 9 semesters.
  - c. Bachelor of Science in Human Biology within 15 semesters.
  - d. Associate of Arts in Biological Sciences within 8 semesters.
  - e. Associate of Applied Science within 9 semesters.
  - f. Certificate program within 3 semesters.
- Period when a student doesn't receive Title IV aid is counted toward maximum timeframe.
- Period when a student is on leave of absence is counted toward maximum timeframe.

- Student exceeding their programs timeframe will be ineligible for Title IV aid.
- Please be aware that any delay in clinic progression will affect your future financial aid eligibility.

An academic history showing a pattern of enrollment indicating inability or unwillingness to progress, such as but not limited to continued or numerous withdrawals, may be regarded as failing to meet reasonable academic progress standards by the Director of Financial Aid. Student will be ineligible for Title IV aid.

Student flagged with an “Unusual Enrollment History” on the Student Aid Report will be placed on financial aid warning if the issue is not resolved with the Financial Aid Office.

#### FINANCIAL AID GOOD STANDING

Student maintains satisfactory academic progress.

*Student must be in “good standing” to receive federal work-study funds.*

#### FINANCIAL AID WARNING

Student fails to meet the GPA requirement and/or has not completed the minimum credit hours for their program and/or fails to meet reasonable academic progress standards will be placed on financial aid warning. Student in a warning status is still allowed to receive Title IV aid (except federal work-study funds) and is given one trimester/semester to demonstrate satisfactory progress. Specific terms and conditions may be required.

#### INELIGIBLE FOR TITLE IV AID

When student fails to meet the GPA requirements and/or has not completed the minimum credit hours for their program and/or fails to meet reasonable academic progress standards at the end of the warning trimester/semester. Specific terms and conditions may be required.

#### FINANCIAL AID APPEAL

Student may appeal their ineligibility to receive Title IV aid (except federal work-study funds) under extenuating or special circumstances. A written request detailing the circumstances and documentation of the circumstances, why student failed to meet SAP and what has changed that will allow student to demonstrate SAP at the end of the trimester/semester must be submitted to the Director of Financial Aid for review. Specific terms and conditions may be required.

#### FINANCIAL AID PROBATION

Title IV eligibility is reinstated (except federal work-study funds) for one trimester/semester if an appeal has been approved. Specific terms and conditions may be required.

#### FINANCIAL AID REINSTATEMENT

Title IV eligibility is reinstated (except federal work-study funds) when the GPA requirement is met and /or the minimum credit hours has been satisfactorily completed and/or met reasonable academic progress standards.

#### DUAL CREDIT

The University offers advanced students from participating high schools the opportunity to earn Cleveland University-Kansas City undergraduate college credit prior to high school graduation through the CUKC Dual Credit Program. Qualified students may enroll in introductory college courses that meet general requirements for a bachelor's degree or specific science courses such as Anatomy & Physiology that could apply toward a program in a science or health care related field. See the CUKC Registrar's Office for more information on Dual Credit offerings.
